1 Panel - Quilted Blocks and Borders – using NO Show Mesh as Stabilizer and securing embroidery batting with background fabric via the basting stitch (step 1 in the design). This method makes the Background fabric and Backing fabric are the same size.

1. Hoop the No Show Mesh, then stitch the basting stitch (color change 1) on top of the No Show Mesh.
2. Go back to color change 1, center embroidery batting and background fabric on top of hoop within basting stitches.
3. Secure embroidery batting and background fabric with basting stitches (color change 1)

NOTE: cut embroidery batting 1" larger than trimmed block size.
